

Product information

VD-...FT

Flow switch VD-...FT

- **Highly reproducible**
- **Insensitive to dirt**
- **DIN flange housing**
- **Precise setting of the switching valve**

Characteristics

Mechanical flow switch, for fluid media, with contactless triggering of an adjustable Reed contact. Robust construction in cast steel material.

Technical data

Switch	Reed switch	
Nominal width	DN 15..150	
Process connection	flange	
Adjustment range	2..950 l/min	For details see table "Ranges"
Q_{max.}	up to 2000 l/min	
Hysteresis	Depending on the switching value, minimum 0.3 l/min	
Tolerance	±5 % of full scale value	
Pressure resistance	PN 40	
Medium temperature	-20...+120 °C	
Ambient temperature	-20...+70 °C	
Media	Water, oils (aggressive media available on request)	
Wiring	wiring No. 0.213	
Switching voltage	Max. 175 V DC / 120 V AC	
Switching current	Max. 0.25 A DC / 0.18 A AC	
Switch capacity	Max. 5 W / VA	
Protection class	2 - Safety insulation	
Ingress protection	IP 44 optional IP 65	
Connection	Plug DIN 43650-A / ISO 4400	
Materials medium-contact	1.4310, Cast steel GSC 25, CW614N, POM, NBR, Klingerit, hardferrite	
Non-medium-contact materials	ABS	

Weight	see table "Dimensions and weights"
Installation location	Standard: horizontal inwards flow; switching head not recommended underneath; other installation positions are possible; the installation position affects the switching point and range.

Ranges

Details in the table correspond to horizontal inwards flow with decreasing flow rate.

Type	Nominal width	Adjustment range l/min H ₂ O		Q _{max.} recommended	
VD-015FT...	DN 15	2 - 8	20	20	30
VD-020FT...	DN 20	4 - 20	100	40	55
VD-025FT...	DN 25	10 - 40	200	60	80
VD-032FT...	DN 32	20 - 60	300 - 100	100	135
VD-040FT...	DN 40	30 - 100	500 - 200	150	270
VD-050FT...	DN 50	50 - 200	1000 - 250	270	340
VD-065FT...	DN 65	100 - 250	1500 - 300	400	
VD-080FT...	DN 80	150 - 300	3000 - 450	600	
VD-100FT...	DN 100	200 - 400	3500 - 500	950	
VD-150FT...	DN 150	600 - 750	7000 - 950	2000	

Dimensions and weights

Overall length DIN 3202, range F1

Flange DIN 2545 PN 40

Flange size DIN 2501 PN 40

Sealing bar DIN 2526 form C

Types	H mm	L mm	D mm	k mm	d mm	Weight kg
VD-015FT...	180	130	95	65	4x14	4.0

3. Connection material	
T	stainless steel
4. Adjustment range H ₂ O for horizontal inwards flow	
008	2 - 8 l/min
020	4 - 20 l/min
040	10 - 40 l/min
060	20 - 60 l/min
100	30 - 100 l/min
200	50 - 200 l/min
250	100 - 250 l/min
300	150 - 300 l/min
400	200 - 400 l/min
450	300 - 450 l/min
500	350 - 500 l/min
750	600 - 750 l/min
950	700 - 950 l/min
5. Optionally for ATEX	
A	For ATEX A-V1 switching head (The switching head is ordered in addition) 

Handling and operation

Note

- Include straight calming section of 5 x DN in inlet and outlet.
- If the media are dirty, install a filter (use magnetic filter for ferritic components).
- It must be ensured that the values given for voltage, current, and power are not exceeded.
- When switched on, a load must be connected in series.
- The electrical details apply to ohmic loads. Capacitive, inductive and lamp loads must be operated using a protective circuit.

Adjustment

To adjust the switching point, the fixing screw for the switching head must be loosened. The switching head can then be rotated. Turning to the right increases the switching point, and vice-versa. Then retighten the fixing screw.

Options

- Other signal lamp
- Temperature display 0..120 °C
- Temperature monitoring 40..90 °C
- Temperature resistant up to 150 °C
- Protection class IP 65
- Metal cap
- Switching ranges for oil
- Special values
- Switch contact SPDT change over 250 VAC 0.35 A 30 VA increased hysteresis depending on switching value

Ordering information

- Specify direction of flow, medium, and switching range.
- For oils, state viscosity, temperature and designation (e.g. ISO VG 68) (enquire about switching range).
